Thromboinflammation: An Evolving Multifaceted Concept

Message from the Guest Editors

To understand thromboinflammation, it is vital to look deeply at the interactions between platelets, white blood cells, and endothelial cells, and between such host components and pathogens. Several classes of receptors and signal transduction pathways are likely involved in the generation of thromboinflammation, but the underlying molecular mechanisms are mostly unknown. This Special Issue will focus on most recent advances in the study of the molecular mechanisms supporting thromboinflammation. Both original research and review articles as well as short communications are strongly encouraged. Methodological studies focusing on new models and research techniques to study these aspects are also welcome.

Guest Editors

Dr. Gianni Francesco Guidetti

Laboratory of Biochemistry, Department of Biology and Biotechnology "L. Spallanzani", University of Pavia, 27100 Pavia, Italy

Dr. Silvia Stella Barbieri

Unit of Head of Brain-Heart Axis: Cellular and Molecular Mechanisms, Centro Cardiologico Monzino IRCCS, Via C. Parea, 4_20138 Milan, Italy

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
