

## Special Issue

# Traditional Medicine – Unraveling Its Molecular Mechanism, Volume 2

### Message from the Guest Editor

As the limitations of Western medicine are more realized, the reappraisal of Traditional Medicine can open new avenues for treatments. A major advantage is that Traditional Medicine has developed over several centuries and has therefore matured much more than Western medicine, which only has a relatively short history. For example, the principle of personalized medicine, one of the pillars of Traditional Medicine, was only quite recently adopted by Western Medicine. We hope that the second issue on Traditional Medicine proceeds on the path started with the first issue, and forms a platform for new research to further strengthen the connection of the world of Traditional Medicine to the Western world.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
