

Special Issue

Translational Control

Message from the Guest Editor

The field of translational control has really taken off due to pivotal discoveries in the last decade. In a context where translation did not seem to be a major issue in the control of gene expression, the emergence of miRNAs brought translational control to the forefront of gene regulation. In the recent years, many outstanding reports have highlighted the field and extended the knowledge in several areas impacting translational control. These findings have occurred in conjunction with, or due to significant technological advances in the field of transcriptomics, proteomics and structural biology, coupled to bioinformatics. In particular, technologies derived from RNA-Seq, as well as proteomics progress, including nano mass spectrometry methods have allowed large scale approaches in the field of translation. This Special Issue on translational control will welcome research articles as well as reviews in the emerging areas of translational control, in order to provide an update to this growing field.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
