Advanced Research on Tumor Endothelial Cells

Message from the Guest Editors

Tumor blood vessels supply the tumor with oxygen and nutrients and provide a gateway for tumor metastasis; thus, tumor progression depends on angiogenesis. Since the approval of the first antiangiogenic drug, bevacizumab, tumor endothelial cells (TECs) have been considered “the second most important target for cancer therapy”. Antiangiogenic drugs have shown their benefit when used in combination with chemotherapeutic drugs. However, it has been reported that these drugs have several issues that need to be overcome, such as side effects and drug resistance. Recent studies have elucidated that TECs differ from normal endothelial cells (NECs) both morphologically and physiologically, contrary to previous presumptions. Additionally, it has been reported that TECs are not homogeneous and constitute a heterogeneous population. To develop novel cancer therapy, it is important to study TECs. This Special Issue focuses on tumor endothelial cell biology and discussing the consequence of their altered phenotypes.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
