Extracellular Vesicles and Tumour Microenvironment 2.0

Message from the Guest Editor

Tumour-derived exosomes are emerging mediators of tumorigenesis. Exosomes are small membrane extracellular vesicles (EVs) (40–150 nm) derived from the luminal membranes of multivesicular bodies and are released via fusion with the cell membrane. Exosomes contain bioactive molecules, such as nucleic acids (DNA, mRNA, miRNA, and other noncoding RNAs), proteins (receptors, transcription factors, enzymes, extracellular matrix proteins), and lipids that can redirect the function of a recipient cell. During primary tumour formation, tumour cells require active communication with neighboring cells and their local microenvironment. In recent years, the critical role of EVs in cell–cell communications between tumour cells and surrounding cells in the primary tumour microenvironment has been highlighted. Here, we focus on the role of EVs, and in particular of exosomes, as critical mediators of intracellular communication between tumour cells and stromal cells in local and distant microenvironments.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
