

## Special Issue

# Translational Aspects of Infectious Diseases: From Bench to Bedside

### Message from the Guest Editor

The COVID-19 pandemic has shown us the importance of anticipating infectious risks and the need for responses adapted to each individual's epidemiological situation. We have debated a lot about the interest of specific measures throughout the period, but beyond that, we have realized the importance of simple but applicable and applied prevention measures. In this future issue, we would like to bring to our readers a cross-sectional reflection including the different actors involved in the control and fight against infectious diseases. The topics discussed will open new horizons not only in the field of prevention, but also in the field of therapy. I hope that you will join us.

### Guest Editor

Dr. Jean-ralph Zahar

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Pier Paolo Claudio

Department of Pharmacology and Toxicology, Cancer Center and  
Research Institute, University of Mississippi Medical Center, Jackson,  
MS 39216, USA

---

#### Author Benefits

##### Open Access:

free for readers, with article processing charges (APC) paid  
by authors or their institutions.

##### High Visibility:

indexed within Scopus and other databases.

##### Journal Rank:

CiteScore - Q2 (Medicine (miscellaneous))
