# Message from the Editor-in-Chief

The mission of *International Medical Education* is to provide an open platform with which to create an international community of scholars, medical educators, learners, policy-making organs, and researchers on all aspects of current and innovative medical educational programs as well as activities in the development of the internationalization of medical education as a whole.

*International Medical Education* publishes original research articles, reviews, case reports, opinions, and other article types. Computed data or files, unable to be published in the normal way, can be deposited as supplementary material. Online features can take advantage of the variety of media made possible through electronic publishing, including the use of audio, video, complex or dynamic graphic displays, interactive sessions, performances, and other means by which to improve the communication of scholarly work. Features may be presented as a single article or in serial form.
