

## Special Issue

# Immunological Responses and Therapeutic Modulation in Viral Infections: From Acute Disease to Latency

### Message from the Guest Editor

This Special Issue will provide a comprehensive overview of the immune responses involved in various viral infections, spanning from acute to latent phases, and to highlight novel immunotherapeutic strategies. By gathering original research, reviews, and perspectives from virology, immunology, and clinical disciplines, this Special Issue will advance our understanding of how viral infections shape and are shaped by the immune system. The collected articles will provide insights into current immunotherapeutic approaches, identify gaps in our knowledge, and offer directions for future research to improve viral disease outcomes through immune-based interventions. We welcome submissions that address mechanistic studies, translational research, clinical trials, and emerging technologies to deepen our understanding of immunological processes in viral infections.

### Guest Editor

Dr. Sherif T.S. Hassan

Department of Applied Ecology, Faculty of Environmental Sciences,  
Czech University of Life Sciences Prague, Kamýcká 129, 165 00 Prague,  
Czech Republic

### Deadline for manuscript submissions

31 July 2026

#### Author Benefits

##### Open Access:

free for readers, with article processing charges (APC) paid  
by authors or their institutions.

##### High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO,  
and other databases.

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 28.8 days after  
submission; acceptance to publication is undertaken in 2.7  
days (median values for papers published in this journal in  
the second half of 2025).
