

## Special Issue

# The Role of Cytokines and Autoantibodies Against Cytokines in Health and Disease

### Message from the Guest Editor

Cytokines are small proteins crucial for regulating cell growth, inhibition, and activity. They activate immune functions and affect various cells. Beneficial cytokine effects have led to pharmacological treatments for diseases, with antibodies against specific cytokines successfully used to reduce inflammation and disease burden. However, autoantibodies targeting cytokines have been identified, potentially neutralizing and inhibiting cytokine functions, though their role remains unclear, even in healthy individuals.

This Special Issue explores cytokine functions in physiological and pathological contexts and the role of autoantibodies targeting cytokines. We encourage submissions on pharmacological methods for modulating cytokine effects, including delivery mechanisms and inhibitory strategies, from both human and animal model studies.

### Guest Editor

Prof. Dr. Juan Bautista De Sanctis

Institute of Molecular and Translational Medicine, Faculty of Medicine and Dentistry, Palacký University, 77900 Olomouc, Czech Republic

### Deadline for manuscript submissions

30 August 2025

#### Author Benefits

##### Open Access:

free for readers, with article processing charges (APC) paid  
by authors or their institutions.

##### High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO,  
and other databases.

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 31.6 days after  
submission; acceptance to publication is undertaken in 2.9  
days (median values for papers published in this journal in  
the first half of 2025).
