Deadline for manuscript
submissions:

31 July 2022

Message from the Guest Editor

This Special Issue in *Informatics* welcomes papers in the field of big data. The scope includes but is not limited to data capture and storage; search, sharing, and analytics; big data technologies; data visualization; architectures for massively parallel processing; data mining tools and techniques; machine learning algorithms for Big Data; cloud computing platforms; distributed file systems and databases; and scalable storage systems. New submitted papers must be pre-peer-reviewed by the Editorial Board. If your paper is well prepared and approved for further publication, you might be eligible for discounts for your publication.
