

## Special Issue

# Health Informatics: Feature Review Papers

### Message from the Guest Editors

Biomedical and health informatics is an interdisciplinary field, where the central theme is to explore the effective uses of data, information, and knowledge for scientific inquiry, problem-solving, and decision-making, motivated by efforts to improve human health. Research in health informatics has always been data-centric, and advancements have heavily relied on the availability of various, heterogenous, and novel new data sources. For example, the rapid adoption of electronic health records (EHRs) in the past few decades has made large collections of real-world healthcare data available. Further, recent advancements in artificial intelligence, especially machine learning and deep learning, have enabled us to develop novel biomedical and health informatics methods and tools to address a wide range of applications in improving health and health equity. This Special Issue invites review papers related to all aspects of health informatics: artificial intelligence and data science, electronic health records, curation of novel data sources, digital health, social determinants of health, causal inference, clinical trial design, etc.

## About the Journal

### Message from the Editor-in-Chief

*Informatics* (ISSN 2227-9709) is an international, peer-reviewed, open access journal, which publishes original theoretical and empirical work on the science of informatics and its application in multiple fields. Our concept of Informatics includes technologies of information and communication as well as the biological, social, linguistic and cultural changes that initiate, accompany and complicate their development. *Informatics* publishes regular research articles, reviews and short notes. There is no restriction on the length of papers, and we encourage researchers to publish their theoretical and empirical results in as much detail as possible. The scientific community and the public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), dblp, and other databases.

#### Journal Rank:

CiteScore - Q1 (Communication)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 34.9 days after submission; acceptance to publication is undertaken in 4.7 days (median values for papers published in this journal in the first half of 2025).
