

Special Issue

The Smart Cities Continuum via Machine Learning and Artificial Intelligence

Message from the Guest Editors

This Special Issue welcomes contributions describing tools and methodologies and review papers with state-of-the-art findings that can significantly contribute to advancements in Smart Cities. Moreover, we expect to focus on all aspects and future research directions in the rapidly progressing subject of smart cities and their applications, aiming to provide the opportunity for researchers and practitioners to share their latest work on emerging topics. We welcome submissions from researchers from all backgrounds and look forward to reading your work. Relevant topics include, but are not limited to, the following:

- Smart city applications and services
- Smart city management platforms
- Modeling and simulation of smart cities
- Emerging technologies for critical verticals
- Information and communication technology (ICT) in smart cities
- People-centric systems and crowd-based computing in smart cities
- Business models for smart and circular cities
- Cloud, Fog, Edge, and service-oriented computing for smart cities
- Artificial intelligence and machine learning technologies

About the Journal

Message from the Editor-in-Chief

Informatics (ISSN 2227-9709) is an international, peer-reviewed, open access journal, which publishes original theoretical and empirical work on the science of informatics and its application in multiple fields. Our concept of Informatics includes technologies of information and communication as well as the biological, social, linguistic and cultural changes that initiate, accompany and complicate their development. *Informatics* publishes regular research articles, reviews and short notes. There is no restriction on the length of papers, and we encourage researchers to publish their theoretical and empirical results in as much detail as possible. The scientific community and the public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Antony Bryant
School of Built Environment, Engineering, and Computing, Leeds
Beckett University, Leeds LS6 3QS, UK

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), dblp, and other databases.

Journal Rank:

CiteScore - Q1 (Communication)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 34.9 days after submission; acceptance to publication is undertaken in 4.7 days (median values for papers published in this journal in the first half of 2025).
