Digital Society: Interdisciplinary Insights and Applications of Wireless Connectivity

Message from the Guest Editors

Wireless communication systems have evolved into ubiquitous tools that seamlessly integrate with various interdisciplinary applications. They have redefined how we communicate, share information, and access services. In society, wireless communication has fostered connectivity on a global scale, enabling instant communication, remote work, and the proliferation of smart devices. In informatics, these technologies have expanded the capabilities of computing systems, allowing for the collection and transmission of vast amounts of data, fueling advancements in artificial intelligence, cloud computing, and the Internet of Things. Furthermore, they have revolutionized healthcare through telemedicine and remote monitoring, thus optimizing patient care. As these wireless communication systems continue to reshape our daily lives across various fields, addressing security and privacy aspects has become paramount to ensure the integrity and confidentiality of the vast amounts of data being transmitted and shared.

About the Journal

Message from the Editor-in-Chief

Informatics (ISSN 2227-9709) is an international, peer-reviewed, open access journal, which publishes original theoretical and empirical work on the science of informatics and its application in multiple fields. Our concept of Informatics includes technologies of information and communication as well as the biological, social, linguistic and cultural changes that initiate, accompany and complicate their development. *Informatics* publishes regular research articles, reviews and short notes. There is no restriction on the length of papers, and we encourage researchers to publish their theoretical and empirical results in as much detail as possible. The scientific community and the public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Antony Bryant
Headingley Campus, Leeds Beckett University, Leeds LS6 3QS, UK

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), dblp, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Interdisciplinary Applications) / CiteScore - Q1 (Communication)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 38.1 days after submission; acceptance to publication is undertaken in 6.1 days (median values for papers published in this journal in the second half of 2024).
