

Special Issue

Artificial Intelligence (AI) in Health and Care

Message from the Guest Editors

The health and care industries have been always quick to adapt and adopt new technologies to differentiate their products and services and improve the quality of health and care. Currently, Artificial Intelligence (AI) and machine learning show significant potential to revolutionize the health and care sectors. Healthcare professionals, medical professionals and organizations, healthcare companies are interested in new AI and machine learning methods and applications and are keen to learn how they can quickly leverage these new technologies to develop innovate services. This Special Issue of the journal Informatics aims to cover recent advances in the development of artificial intelligence and machine learning technologies in the fields of health, care, medicine, health analytics, personalized health and fitness, and pharmacy, as well as relevant informatics research endeavors in this area. Well-prepared papers approved for publication may be eligible for discounts at the Editorial Office's discretion.

About the Journal

Message from the Editor-in-Chief

Informatics (ISSN 2227-9709) is an international, peer-reviewed, open access journal, which publishes original theoretical and empirical work on the science of informatics and its application in multiple fields. Our concept of Informatics includes technologies of information and communication as well as the biological, social, linguistic and cultural changes that initiate, accompany and complicate their development. *Informatics* publishes regular research articles, reviews and short notes. There is no restriction on the length of papers, and we encourage researchers to publish their theoretical and empirical results in as much detail as possible. The scientific community and the public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Antony Bryant
School of Built Environment, Engineering, and Computing, Leeds
Beckett University, Leeds LS6 3QS, UK

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), dblp, and other databases.

Journal Rank:

CiteScore - Q1 (Communication)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 32.1 days after submission; acceptance to publication is undertaken in 4.2 days (median values for papers published in this journal in the second half of 2025).
