

Special Issue

ICT for Genealogical Data

Message from the Guest Editors

The building of genealogical trees has become a popular activity carried out by millions of people, including both hobbyists and scholars. Thanks to the online publication of local official registries of births, marriages, and deaths, new scenarios and perspectives have been opened to enrich genealogical family trees. On the one hand, there are many potentialities given by the huge volume of data, such as the building of very complex genealogical trees covering many centuries of history. On the other hand, the management of large genealogical trees also involves new challenges in the collection, quality, accuracy, storage, querying, analysis, and visualization of genealogical data. This Special Issue calls for research articles on novel approaches to genealogical data management. Both conceptual and practical papers describing challenges and perspectives are also welcome. Original contributions that report on real experiences and scenarios in the usage of any kind of genealogical data are also encouraged.

About the Journal

Message from the Editor-in-Chief

Informatics (ISSN 2227-9709) is an international, peer-reviewed, open access journal, which publishes original theoretical and empirical work on the science of informatics and its application in multiple fields. Our concept of Informatics includes technologies of information and communication as well as the biological, social, linguistic and cultural changes that initiate, accompany and complicate their development. *Informatics* publishes regular research articles, reviews and short notes. There is no restriction on the length of papers, and we encourage researchers to publish their theoretical and empirical results in as much detail as possible. The scientific community and the public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Antony Bryant

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), dblp, and other databases.

Journal Rank:

CiteScore - Q1 (Communication)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 34.9 days after submission; acceptance to publication is undertaken in 4.7 days (median values for papers published in this journal in the first half of 2025).
