

Special Issue

Building Smart Cities and Infrastructures for a Sustainable Future

Message from the Guest Editors

Smart cities and infrastructures mean improved operations, promoted sustainability, improved transportation and accessibility, improved social services, and new ways to provide services and connect with citizens, businesses, government, and other organizations. This Special Issue will provide an opportunity for researchers to exchange new ideas across the emerging field. The goal of this Special Issue is to collect high-quality contributions to address smart cities and infrastructure construction and operations. Topics of interest include but are not limited to the ones listed below: Accelerating projects with smart construction and simulation technologies; Digital transformation of the construction enterprise; Smart city infrastructure development and monitoring; Managing the life-cycle cost of smart infrastructure systems; Digitization in construction; Improving critical infrastructure cybersecurity; Smart marine infrastructure and port automation; Digital systems in smart city and infrastructure.

About the Journal

Message from the Editor-in-Chief

Informatics (ISSN 2227-9709) is an international, peer-reviewed, open access journal, which publishes original theoretical and empirical work on the science of informatics and its application in multiple fields. Our concept of Informatics includes technologies of information and communication as well as the biological, social, linguistic and cultural changes that initiate, accompany and complicate their development. *Informatics* publishes regular research articles, reviews and short notes. There is no restriction on the length of papers, and we encourage researchers to publish their theoretical and empirical results in as much detail as possible. The scientific community and the public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Antony Bryant
Headingley Campus, Leeds Beckett University, Leeds LS6 3QS, UK

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), dblp, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Interdisciplinary Applications) / CiteScore - Q1 (Communication)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 38.1 days after submission; acceptance to publication is undertaken in 6.1 days (median values for papers published in this journal in the second half of 2024).
