

Special Issue

Built Environment Informatics

Message from the Guest Editors

Rapid urbanization, changing demographics, property market dynamics, energy consumption, sustainable development, productivity, and the list goes on. The application of digital technology as a mediator of human interaction with the built environment is increasing, the integration of digital infrastructure within the fabric of the built environment is growing, and the quantity and quality of digital data emanating from and about the built environment are exploding. These drivers demand new and urgent considerations of built environment informatics. This Special Issue of *Informatics* welcomes submissions from multiple perspectives on the broad compass of what might usefully contribute to the genesis of a new field of study particular to built environment informatics. We encourage authors to submit original research, work in progress, reviews, case studies and viewpoint articles on any aspect of built environment informatics. Potential application areas include: Health, aging, education, housing, business, productivity, security, construction, design, facilities management, supply chain management, project management, property, urban planning, megaprojects, and infrastructure.

About the Journal

Message from the Editor-in-Chief

Informatics (ISSN 2227-9709) is an international, peer-reviewed, open access journal, which publishes original theoretical and empirical work on the science of informatics and its application in multiple fields. Our concept of Informatics includes technologies of information and communication as well as the biological, social, linguistic and cultural changes that initiate, accompany and complicate their development. *Informatics* publishes regular research articles, reviews and short notes. There is no restriction on the length of papers, and we encourage researchers to publish their theoretical and empirical results in as much detail as possible. The scientific community and the public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Antony Bryant
School of Built Environment, Engineering, and Computing, Leeds
Beckett University, Leeds LS6 3QS, UK

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), dblp, and other databases.

Journal Rank:

CiteScore - Q1 (Communication)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 34.9 days after submission; acceptance to publication is undertaken in 4.7 days (median values for papers published in this journal in the first half of 2025).
