

Special Issue

Emotion, Cognition, and Empathy in Extended Reality Applications

Message from the Guest Editors

Extended reality (XR) applications have now become advanced enough to be used in real-world use cases such as medicine, education, training, gaming, and remote collaboration. Over the last couple of decades, the majority of XR research primarily focused on engineering aspects of the system and recently has started focusing on the usability of the XR systems. A new area of research in the XR domain is focusing on the emotional and cognitive aspects of the applications. The advent of mobile and affordable bio-sensors such as electroencephalography (EEG), electrocardiogram (ECG), and photoplethysmogram (PPG) have made it possible to measure and, in some cases, use neural activities and physiological signals in real-time during the usage of the XR applications. In this Special Issue, we are inviting submissions where multidisciplinary work involving XR and Affective and/or Empathic Computing is performed. We are open to both original research and review articles.

Guest Editors

Dr. Arindam Dey

School of Information Technology and Electrical Engineering, The University of Queensland, Brisbane, QLD 4072, Australia

Prof. Dr. Mark Billinghurst

Empathic Computing Laboratory, University of South Australia, Adelaide 5095, Australia

Deadline for manuscript submissions

closed (30 November 2020)

About the Journal

Message from the Editor-in-Chief

Informatics (ISSN 2227-9709) is an international, peer-reviewed, open access journal, which publishes original theoretical and empirical work on the science of informatics and its application in multiple fields. Our concept of Informatics includes technologies of information and communication as well as the biological, social, linguistic and cultural changes that initiate, accompany and complicate their development. *Informatics* publishes regular research articles, reviews and short notes. There is no restriction on the length of papers, and we encourage researchers to publish their theoretical and empirical results in as much detail as possible. The scientific community and the public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Antony Bryant
School of Built Environment, Engineering, and Computing, Leeds
Beckett University, Leeds LS6 3QS, UK

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), dblp, and other databases.

Journal Rank:

CiteScore - Q1 (Communication)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 34.9 days after submission; acceptance to publication is undertaken in 4.7 days (median values for papers published in this journal in the first half of 2025).
