Special Issue

Feature Papers in Informatics in 2022

Message from the Guest Editor

We are pleased to announce this *Informatics* journal 2022 Feature Paper Special Issue, following on from a collection of seventeen papers published in the successful "Feature Papers in Informatics" Special Issue (https://www.mdpi.com/journal/informatics/special_issues/Feature_Papers_Informatics). It will provide a substantial contribution towards the understanding of contemporary biomedical and health informatics, social informatics, as well as machine learning, data mining and analytics, human–computer interaction, and information and communication systems. If your paper is well prepared and approved for further publication, it may be eligible for discounts.

Deadline for manuscript submissions

closed (31 December 2022)

About the Journal

Message from the Editor-in-Chief

Informatics (ISSN 2227-9709) is an international, peer-reviewed, open access journal, which publishes original theoretical and empirical work on the science of informatics and its application in multiple fields. Our concept of Informatics includes technologies of information and communication as well as the biological, social, linguistic and cultural changes that initiate, accompany and complicate their development. *Informatics* publishes regular research articles, reviews and short notes. There is no restriction on the length of papers, and we encourage researchers to publish their theoretical and empirical results in as much detail as possible. The scientific community and the public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.
