

## Special Issue

# The Future of Network Softwarization: A Network Function Virtualization Approach

### Message from the Guest Editor

Network function virtualization (NFV) along with service function chaining (SFC) have played a significant role in softwarizing the network infrastructure. In particular, both technologies have revolutionized the way network functions and services are offered, promoting significant agility and cost reductions. Even though NFV solutions have been extensively used and analyzed regarding cloud- and enterprise-based scenarios, new requirements, constraints, and opportunities arise from the advent of new technologies such as Internet of Things (IoT) and 5G. The key ingredient to the success story of IoT and 5G will be the softwarization of network infrastructure, rendering NFV one of the foundation components of this network evolution. To this end, this Special Issue is soliciting conceptual, theoretical, and experimental contributions to a set of currently unresolved challenges in the area of IoT and 5G-aware NFV platforms.

## About the Journal

### Message from the Editor-in-Chief

*Informatics* (ISSN 2227-9709) is an international, peer-reviewed, open access journal, which publishes original theoretical and empirical work on the science of informatics and its application in multiple fields. Our concept of Informatics includes technologies of information and communication as well as the biological, social, linguistic and cultural changes that initiate, accompany and complicate their development. *Informatics* publishes regular research articles, reviews and short notes. There is no restriction on the length of papers, and we encourage researchers to publish their theoretical and empirical results in as much detail as possible. The scientific community and the public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), dblp, and other databases.

#### Journal Rank:

CiteScore - Q1 (Communication)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 34.9 days after submission; acceptance to publication is undertaken in 4.7 days (median values for papers published in this journal in the first half of 2025).
