

Special Issue

Managing the Consequences of the COVID-19 in the Every-Day Working, Learning, and Interacting Life

Message from the Guest Editors

The aim of this Special Issue is to address this question, gathering insights from scholars and practitioners that can help organizations to face this difficult time and complex working landscape generated by the coronavirus crisis. We look for original contributions that nurse the discussion or propose a novel understanding of the changes in the way of working that any private, public, and social organization has to face to survive, to protect its sustainability, and to reframe its value creation mechanisms. Countries' and organizations' crisis-response efforts are in full motion, and scholars must contribute to understanding how the way of working is changed and what will never be as it was previously.

About the Journal

Message from the Editor-in-Chief

Informatics (ISSN 2227-9709) is an international, peer-reviewed, open access journal, which publishes original theoretical and empirical work on the science of informatics and its application in multiple fields. Our concept of Informatics includes technologies of information and communication as well as the biological, social, linguistic and cultural changes that initiate, accompany and complicate their development. *Informatics* publishes regular research articles, reviews and short notes. There is no restriction on the length of papers, and we encourage researchers to publish their theoretical and empirical results in as much detail as possible. The scientific community and the public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Antony Bryant
Headingley Campus, Leeds Beckett University, Leeds LS6 3QS, UK

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), dblp, and other databases.

Journal Rank:

CiteScore - Q1 (Communication)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 34.9 days after submission; acceptance to publication is undertaken in 4.7 days (median values for papers published in this journal in the first half of 2025).
