2nd Edition of Data Science for Health Services

Guest Editors:

Dr. Philippe J. Giabbanelli
Department of Computer Science & Software Engineering, Miami University, Oxford, OH 45056, USA

Dr. Francisco Iacobelli
College of Business and Technology, Northeastern Illinois University, Chicago, IL 60625, USA

Dr. Charlotte James
Population Health Sciences, Bristol Medical School, University of Bristol, Bristol BS8 1TH, UK.

Deadline for manuscript submissions:
closed (31 January 2025)

Message from the Guest Editors

We are pleased to announce a Special Issue on "Data Science for Health Services II". In recent years, health services have been transformed by the emergence and increased application of data science methods such as predictive modeling, visualization, and artificial intelligence. These methods are being used for service planning, service management, and the delivery of care, thus improving the health of individuals and communities.

We solicit papers for this Special Issue that broadly deal with such challenges by addressing open questions, providing novel case studies, or encouraging interesting and challenging debates. Papers can be reviews, syntheses, viewpoints, meta-analyses, or original research articles.

Special Issue

Editor-in-Chief

Prof. Dr. Willy Susilo
School of Computer Science and
Software Engineering, University
of Wollongong, Northfields
Avenue, Wollongong, NSW 2522,
Australia

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.
Journal Rank: JCR - Q2 (Computer Science, Information Systems) / CiteScore - Q2 (Information Systems)
