### Message from the Guest Editors

Current research on blockchain focuses on cryptocurrencies like Bitcoin or Ethereum; however, there is a vast, untapped potential for blockchain applications beyond the financial sector. This Special Issue will explore the broad spectrum of innovations and applications where blockchain and AI intersect within ICT. We request original research articles/review articles that delve into the practical and theoretical aspects of these technologies, highlighting their synergistic benefits and transformative potential. We also request papers addressing security and privacy issues related to blockchain and smart contracts, as well as the development of tools and methods for their verification and validation.

## Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

*Information* is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [Ei Compendex](#), [dblp](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Computer Science, Information Systems) / CiteScore - Q2 (Information Systems)
