Deadline for manuscript
submissions:

closed (15 January 2019)

Message from the Guest Editors

Dear Colleagues,

This Special Issue will present extended versions of selected papers presented at the 18th International Conference AIMSA 2018—Artificial Intelligence: Methodology, Systems, and Applications. Initiated in 1984, the biennial AIMSA conference is a premier forum for exchanging information and research results on AI theory and principles along with applications of intelligent system technology. The conference traditionally brings together academic and industrial researchers from all areas of AI to share their ideas and experiences and learn about the research in contemporary AI. As its name indicates, the conference is dedicated to Artificial Intelligence in its entirety. However, for AIMSA 2018, we would like to put an emphasis on Deep Learning as it has been used successfully in many applications, and is considered one of the most cutting-edge machine learning and AI techniques at the moment. Authors of invited papers should be aware that the final submitted manuscript must provide a minimum of 50% new content and not exceed 30% copy/paste from the proceedings paper.

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by Ei Compindex, Scopus (Elsevier), Emerging Sources Citation Index (ESCI - Web of Science) and other databases.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 18.9 days after submission; acceptance to publication is undertaken in 4.5 days (median values for papers published in this journal in the first half of 2019).
