

## Big Data Analytics in Smart Cities

Guest Editors:

**Dr. Tahir Cetin Akinci**

Winston Chung Global Energy  
Center (WCGEC), University of  
California Riverside, Riverside, CA  
92521, USA

**Dr. Mustafa Ilhan Akbas**

Electrical Engineering and  
Computer Science, Embry-Riddle  
Aeronautical University, Daytona  
Beach, FL 32114, USA

**Dr. Maurizio Vincini**

Department of Information  
Engineering, University of  
Modena and Reggio Emilia,  
41121 Modena, Italy

Deadline for manuscript  
submissions:

**30 September 2024**

### Message from the Guest Editors

As our cities become "smart", harnessing the power of extensive datasets becomes increasingly imperative for informed decision making and effective resource management. In the context of Smart Cities, Big Data analytics has acquired a versatile, in-depth understanding. It shapes the transformative potential of data for tomorrow's cities, influencing real-time data usage for traffic management, predictive analytics for resource allocation, and more, spanning areas such as security, energy transmission, regional governance, and beyond. Technology, data, and urban intelligence engage in a complex interplay that shapes the cities of the future.

We invite original research articles and reviews to be submitted to this Special Issue. Research areas may include (but are not limited to) the following:

Autonomous/electric vehicles  
Electric vehicle charging station location planning  
Smart City applications  
Statistics and mathematics  
Crowdsensing  
Game theory  
Agent based modeling  
Engineering/traffic Systems  
Computer and computational sciences  
Electrical, electronic, and automation systems  
Aviation and drone technologies  
Energy systems  
Social media

an Open Access Journal by MDPI

## Editor-in-Chief

School of Computer Science and  
Software Engineering, University  
of Wollongong, Northfields  
Avenue, Wollongong, NSW 2522,  
Australia

## Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

*Information* is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [Ei Compendex](#), [dblp](#), and [other databases](#).

**Journal Rank:** CiteScore - Q2 (*Information Systems*)
