

Special Issue

2nd Edition of Data Science for Health Services

Message from the Guest Editors

We are pleased to announce a Special Issue on “Data Science for Health Services II”. In recent years, health services have been transformed by the emergence and increased application of data science methods such as predictive modeling, visualization, and artificial intelligence. These methods are being used for service planning, service management, and the delivery of care, thus improving the health of individuals and communities. We solicit papers for this Special Issue that broadly deal with such challenges by addressing open questions, providing novel case studies, or encouraging interesting and challenging debates. Papers can be reviews, syntheses, viewpoints, meta-analyses, or original research articles.

Guest Editors

Dr. Philippe J. Giabbanelli
Dr. Francisco Iacobelli
Dr. Charlotte James

About the Journal

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Editor-in-Chief

Prof. Dr. Willy Susilo

School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Information Systems) /
CiteScore - Q2 (Information Systems)
