

Special Issue

Intelligent Agent and Multi-Agent System

Message from the Guest Editor

Research conducted on intelligent agents and multiagent systems has matured over the last decade, with many effective applications of this technology having been deployed. Despite the fact that artificial intelligence (AI) technologies for multiagent systems have only mainly emerged in recent decades, a variety of approaches has been proposed for solving certain real-life problems. It has allowed for the development of distributed and intelligent applications in complex and dynamic environments, also playing a crucial role in life, evidenced by the broad range of areas of application involved in their use, including manufacturing, management sciences, e-commerce, etc. The main aim of this Special Issue is to seek high-quality submissions focusing on theoretical and practical aspects of multiagent systems, including theories, applications and simulations concerning AI technology. These include, but are not limited to, concepts, systems and applications of agent technologies.

About the Journal

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Editor-in-Chief

Prof. Dr. Willy Susilo

School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Information Systems) /
CiteScore - Q2 (Information Systems)
