

Special Issue

Advancements in Healthcare Data Science: Innovations, Challenges and Applications

Message from the Guest Editor

This Special Issue aims to explore the transformative impact of data science on healthcare, focusing on the latest innovations, challenges, and applications in the field. With the rapid evolution of healthcare technologies and the proliferation of healthcare data, data science has emerged as a powerful tool for revolutionizing healthcare delivery, improving patient outcomes, and enhancing clinical decision making. This Special Issue seeks to bring together cutting-edge research and practical insights from experts in academia, industry, and healthcare institutions to address key challenges, explore novel methodologies, and showcase successful applications of data science in healthcare settings.

About the Journal

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Editor-in-Chief

Prof. Dr. Willy Susilo

School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Information Systems) /
CiteScore - Q2 (Information Systems)
