

# Special Issue

## 5G and Wireless Networks Communications

### Message from the Guest Editors

The purpose of this Special Issue is to present the latest technologies and developments in 5G-related subsystems. All researchers in the field are invited to contribute with their original, unpublished works. Both research and review papers are welcome. Topics of interest include but are not limited to:

- 5G wireless communications:
  - Network architectures;
  - Green wireless networks;
  - MIMO systems;
  - Channel modeling;
  - Microwave/mm-wave circuits;
  - Antennas and integrated antennas;
- IoT within the 5G context:
  - Green IoT;
  - Integrated RFIDs;
  - Sensor networks;
  - Intelligent sensors;
  - Active and passive sensors;
  - Smart objects;
  - Device-to-device (D2D) communications;
  - Localization.

## About the Journal

### Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

*Information* is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.
