

Special Issue

Advancing Smart Systems Through Deep Learning, Generative AI, and Big Data Analytics

Message from the Guest Editors

This Special Issue aims to bring together cutting-edge research that explores the integration of deep learning, generative AI, and reinforcement learning techniques to enhance smart manufacturing, digital intelligent education, and smart agriculture. This Special Issue will focus on, but is not limited to, the following key areas: (1) Deep learning for smart systems; (2) Generative AI and big data analytics in industrial applications; (3) Generative AI in higher education; (4) Human–robot collaboration with deep reinforcement learning; (5) Deep learning for smart agriculture; (6) Artificial intelligence for next-generation networks and digital ecosystems.

Guest Editors

Dr. Xin Lu

Dr. Jianhua Yang

Dr. Xiaoxia Li

Dr. Dehao Wu

Dr. Wei Wang

About the Journal

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Editor-in-Chief

Prof. Dr. Willy Susilo

School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Information Systems) /
CiteScore - Q2 (Information Systems)
