

## Special Issue

# Knowledge Graph Technology and Its Applications, 3rd Edition

### Message from the Guest Editor

MDPI's *Information* is introducing a new Special Issue. Original papers related to knowledge graph technology and its applications will be considered for publication. This Special Issue aims to bring together researchers in the knowledge graph research community to present innovative research results or novel applications. In this Special Issue, we solicit papers on various aspects of knowledge graph technology from various fields such as the semantic web, knowledge engineering, ontology, natural language processing, machine learning, and novel applications of knowledge graph technologies to promote research activities in these fields.

## About the Journal

### Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

*Information* is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.
