

Special Issue

Intelligent Interaction in Cultural Heritage

Message from the Guest Editors

This Special Issue explores the role of emerging technologies in enhancing the interaction between users and cultural heritage. It aims to showcase innovative research that integrates advanced tools such as augmented and virtual reality (AR/VR), 3D modeling, and personalization and recommendation systems within the cultural heritage domain. We welcome contributions on topics like how artificial intelligence, affective computing, and machine learning can enhance user engagement, and how personalization can be used to offer tailored cultural experiences. Emphasis is placed on the role of these technologies in museums, archaeological sites, and other cultural heritage environments, demonstrating their potential to enrich both digital and physical interactions with cultural assets.

About the Journal

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Editor-in-Chief

Prof. Dr. Willy Susilo

School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Information Systems) /
CiteScore - Q2 (Information Systems)
