Special Issue

Large-Scale Data Mining and Decision Automation

Message from the Guest Editors

This Special Issue aims to publish papers furthering the utilization of big data for large-scale data mining and optimization that facilitate the development of decision automation systems. We encourage innovative business models and novel use cases that can benefit large-scale data mining or optimization. Possible topics include, but are not limited to, the following:

- Large-scale data mining and knowledge discovery;
- Large-scale optimization;
- Social media analytics;
- Data-driven approaches;
- Decision automation strategies;
- Stochastic, online, and robust algorithms;
- Adaptive learning;
- Data-driven digital platforms;
- Human mobility analytics.

Guest Editors

Dr. Junming Liu

Dr. Yu Yang

Dr. Jingyuan Yang

Deadline for manuscript submissions

closed (31 December 2023)

About the Journal

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Editor-in-Chief

Prof. Dr. Willy Susilo
School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

Author Benefits

Open Access:
free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:
indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.

Journal Rank:
JCR - Q2 (Computer Science, Information Systems) / CiteScore - Q2 (Information Systems)
