Special Issue

Information Security, Data Preservation and Digital Forensics

Message from the Guest Editors

The Special Issue "Information Security, Data Preservation and Digital Forensics" is Online! This Special Issue aims to present contemporary problems and challenges in information security, data preservation and digital forensics, as well as possible solutions in the form of developed approaches, methods, methodologies and algorithms. The role of technologies, machine learning and artificial intelligence is also within the scope of consideration, due to their ever-increasing importance for implementing preventive and countermeasures corresponding to the complexity and severity of the attacks being conducted. Due to the sophistication of cybercrimes and the application of anti-forensic techniques by offenders, it is also necessary to create appropriate approaches for identifying and analyzing digital evidence. Studying the human behavior of the victim and attacker also contributes to understanding and reconstructing the cyber scene.

About the Journal

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Editor-in-Chief

Prof. Dr. Willy Susilo
School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

Author Benefits

Open Access:
free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:
indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.

Journal Rank:
JCR - Q2 (Computer Science, Information Systems) / CiteScore - Q2 (Information Systems)
