

Special Issue

Data Security and Privacy in Cloud and IoT

Message from the Guest Editor

The goal of this Special Issue is to collect a wide variety of research or literature papers written by experts to provide insights into the state-of-the-art technology, architecture, mechanism, protocol, application, and practice developed for data security and privacy, especially those based on the platforms of the cloud and the IoT. Our mission is to advance the existing body of knowledge by sharing contemporary, cutting-edge research in data security and privacy. Moreover, we aim to provide a platform for valuable work and research to address new, innovative, and state-of-the-art data security and privacy applications. The topics of interest include but are not limited to:

- Security attack in the cloud/IoT
- Threat models and attack methodologies
- Security and privacy reviews in the cloud/IoT
- Security and protection architectures
- Data analysis security and privacy
- Authentication models
- Access control methods
- Cryptography protocols and algorithms
- Trustworthy models
- AI-empowered security
- Explainable AI
- Energy efficient solutions in the cloud/IoT
- Security applications and management
- Risk management for security and privacy
- Zero-trust models

About the Journal

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Editor-in-Chief

Prof. Dr. Willy Susilo

School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Information Systems) /
CiteScore - Q2 (Information Systems)
