Special Issue

Application of Big Data for Computational Social Science (ABCSS2019 @ WI 2019)

Message from the Guest Editors

We are organizing the workshop ABCSS2019 @ WI2019 of "Applications of Big Data for Computational Social Science". The scopes of the workshop include the applications of big data, as well as the methods for collecting and using big data for computational social science. Moreover, theoretical frameworks and computational techniques for big data are also very important topics in our workshop. In this workshop, social sciences are not limited to sociology, economics, marketing, and political science but also include informatics, complexity science, econophysics, sociophysics, culturomics, and the arts. Selected papers which were presented at ABCSS2019@WI2019 are invited to be submitted as extended versions to this Special Issue of the journal *Information*. Each submission to this journal issue should contain at least 50% of new material, e.g., in the form of technical extensions, more in-depth evaluations, or additional use cases. All submitted papers will undergo our standard peer-review procedure. Accepted papers will be published in open access format in *Information* and collected together on this Special Issue website.

Guest Editors

Dr. Isamu Okada

Dr. Fujio Toriumi

About the Journal

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Editor-in-Chief

Prof. Dr. Willy Susilo
School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

Author Benefits

Open Access:
free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:
indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.

Journal Rank:
CiteScore - Q2 (Information Systems)
