

Special Issue

Big Data Analytics and Computational Intelligence

Message from the Guest Editors

The 4th International Conference on Big Data Analytics, Data Mining, and Computational Intelligence 2019 (BigDaCI'19) will be held in Porto, Portugal during 16–18 July 2019. The BigDaCI'19 conference is expected to provide an opportunity for researchers to meet and discuss the latest solutions, scientific results, and methods regarding solving intriguing problems in the fields of big data analytics, intelligent agents, and computational intelligence and their applications in science, technology, business, and commerce. For more detail, please check <http://www.bigdaci.org/call-for-papers/> The scope and topics of interest of the Special Issue papers follow those BigDaCI'19 and are listed below:

- Big data algorithms and architectures;
- Computational intelligent frameworks for big data processing;
- Data mining topics and applications.

The authors of a number of selected full papers of high quality will be invited after the conference to submit revised and extended versions of their originally accepted conference papers to this Special Issue of *Information* published by MDPI in open access.

About the Journal

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Editor-in-Chief

Prof. Dr. Willy Susilo

School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Information Systems) /
CiteScore - Q2 (Information Systems)
