

Special Issue

Cyberspace Security, Privacy & Forensics

Message from the Guest Editor

Our society has witnessed an unparalleled increase in computer power through advances in both hardware and software. With this, the adversary is crafting attacks of unprecedented sophistication, some of which have well demonstrated their capabilities to cripple not just business enterprises but entire nations. To further complicate matters, the continuing adoption of cloud-computing infrastructure by businesses large and small and the proliferation of the Internet of Things (IoT), is leading to the rapid disappearance of traditional boundaries of IT infrastructure. This Special Issue (SI) aims at bringing together works of critical importance and timeliness in the broad areas of security, forensics, and privacy in computing and communications systems. This SI welcomes manuscripts on all aspects of the modelling, design, implementation, deployment, and management of security, forensics and privacy algorithms, protocols, architectures, and systems. Researchers are encouraged to submit original papers covering novel and scientifically significant works in security, forensics, and privacy. Avinash Srinivasan, Ph.D., CEH, CHFI

About the Journal

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Editor-in-Chief

Prof. Dr. Willy Susilo

School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Information Systems) /
CiteScore - Q2 (Information Systems)
