

## Special Issue

# Data Mining for the Analysis of Performance and Success

### Message from the Guest Editors

The Data mining for the Analysis of Performance and Success workshop will be held on the 18th of November 2017, in New Orleans (USA). Though this is the second edition of the workshop, the research community is positively reacting to the emerging challenges related to the so-called Science of Success. With this Special Issue we look forward to summarizing remarkable contributions in big data tools for performance analytics, predictive models for success, analysis of collective success, well-being, and development, made by the academic community attending to DAPS.

Dr. Luca Pappalardo

## About the Journal

### Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

*Information* is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.

#### Journal Rank:

JCR - Q2 (Computer Science, Information Systems) /  
CiteScore - Q2 (Information Systems)
