# Emerging Research in Artificial Intelligence for Code Analysis and Security

### Message from the Guest Editors

The Special Issue "Emerging Research in Artificial Intelligence for Code Analysis and Security" is Online! This Special Issue focuses on the convergence of AI and code analysis, highlighting emerging research at the intersection of these fields. From enhancing cybersecurity to optimizing code through machine learning, it explores how AI is transforming the way we understand, analyze, and secure software.

## About the Journal

### Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

*Information* is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.
