Special Issue

Emerging Security and Privacy Issues in IoT-based Smart Networks

Message from the Guest Editors

The SITN-2019 workshop is an international event will be held in London, UK on August 19–22, 2019 and in parallel with the CollaborateCom 2019—15th EAI International Conference on Collaborative Computing: Networking, Applications and Worksharing. It provides a venue for international researchers and leading industry experts in IoT and cyber-security to establish future partnerships and research collaborations. The authors of a number of selected full papers of high quality will be invited after the workshop to submit revised and extended versions of their originally accepted conference papers to this Special Issue of *Information* published by MDPI in open access. The selection of these best papers will be based on their ratings in the workshop review process, quality of the presentation during the workshop, and expected impact on the research community. Submitted papers should be extended to the size of regular research or review articles with a 50% extension of new results. All submitted papers will undergo our standard peer-review procedure. This call for papers, however, is also fully open to all who want to contribute by submitting a relevant research manuscript.

About the Journal

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Editor-in-Chief

Prof. Dr. Willy Susilo
School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

Author Benefits

Open Access:
free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:
indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.

Journal Rank:
JCR - Q2 (Computer Science, Information Systems) / CiteScore - Q2 (Information Systems)
