

Special Issue

Optimization and Methodology in Software Engineering, 2nd Edition

Message from the Guest Editors

This Special Issue aims to gather the state of the art in optimizing software development. We seek novel developments in software engineering to manage complexity, assess, measure, and improve the software development process, include the human aspect of software engineering in development methods, and create continual improvement. Topics of interest include but are not limited to: Affect theory applications to software engineering;

Affect detection in software engineering;

Process tailoring methods;

Conflict resolution and prioritization;

AI and machine learning approaches to software development;

Empirical software engineering;

Decision methods;

Formal methods for continual process improvement.

Guest Editors

Prof. Dr. Luigi Benedicenti

About the Journal

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Editor-in-Chief

Prof. Dr. Willy Susilo

School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Information Systems) /
CiteScore - Q2 (Information Systems)
