

Special Issue

Machine Learning for Big Data- -Big Data Service 2019

Message from the Guest Editor

Big Data has incredible potential in fields such as health case, self-driving vehicles, online advertising, energy, and finance. However, its potential highly relies on the performance of the data analytics methods used.

Machine learning is a field that deals with understanding data and building models. Traditional machine-learning techniques rely on assumptions that are no longer valid in the context of Big Data. This Special Issue will address challenges and possible solutions specific to machine learning in the context of Big Data. These issues could be related to any of the aspects of Big Data: its volume, variety, velocity, veracity, or valence.

Keywords

- machine learning
- big data

About the Journal

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Editor-in-Chief

Prof. Dr. Willy Susilo

School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Information Systems) /
CiteScore - Q2 (Information Systems)
