

Special Issue

Biomedical Signal and Image Processing with Artificial Intelligence

Message from the Guest Editors

This Special Issue will also explore the role of **foundation models** and **self-supervised learning** in biomedical applications, which have shown remarkable success in reducing the dependency on large, annotated datasets. Additionally, the integration of **edge AI** and **real-time processing** techniques is revolutionizing point-of-care diagnostics, enabling faster and more efficient decision-making in clinical settings.

About the Journal

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Editor-in-Chief

Prof. Dr. Willy Susilo

School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Information Systems) /
CiteScore - Q2 (Information Systems)
