

## Special Issue

# Computer Vision, Pattern Recognition, and Machine Learning in Italy—Second Edition

### Message from the Guest Editors

Most modern technological innovations are made possible with the most recent advances in pattern recognition, machine learning, and computer vision. The main aim of this Special Issue is to collect works from the Italian research community. These works should report the main theoretical improvements in the aforementioned research areas and their impacts on different application contexts, such as video surveillance and biometry, sports analysis, inspection, assistive and manufacturing technologies, smart agriculture, eHealth, environment monitoring, intelligent transportation and construction, retail, etc.

## About the Journal

### Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

*Information* is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

---

### Editor-in-Chief

Prof. Dr. Willy Susilo

School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.

#### Journal Rank:

JCR - Q2 (Computer Science, Information Systems) /  
CiteScore - Q2 (Information Systems)
