Special Issue

Advances in Knowledge Graphs for Digital Humanities

Message from the Guest Editors

A knowledge graph (KG) is a data structure that captures and represents knowledge in a machine-readable format. Knowledge graphs have the potential to revolutionize the way that scholars in the humanities and cultural heritage disciplines organize, analyze, and discover new insights from vast amounts of cultural data. This Special Issue aims to contribute to the growing body of research on KGs for the domain of digital humanities and cultural heritage. Submissions may be theoretical or empirical in nature. We are particularly interested in papers that demonstrate the application of KGs in digital humanities and cultural heritage, including case studies and demonstrations of tools and methods applied or applicable to digital humanities and cultural heritage.

About the Journal

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Editor-in-Chief

Prof. Dr. Willy Susilo
School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

Author Benefits

Open Access:
free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:
indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.

Journal Rank:
JCR - Q2 (Computer Science, Information Systems) / CiteScore - Q2 (Information Systems)
