

Special Issue

Optical Wireless Communications

Message from the Guest Editors

Recently, research on Optical Wireless Communications (OWC) has increased. This has focused on improving the performance of OWC systems—focusing on devices, components, transceivers, systems, and networks—with the aim of reaching the threshold of Gbits/s. In the area of OWC, Visible Light Communications (VLC) are obtaining great results due to the twofold paradigm of the simultaneous exploitation of both illumination and communication, thus becoming a “green” technology with respect to well-known radio frequency solutions. This Special Issue on “Optical Wireless Communications” is looking for recent advances in VLC, IR, and UV systems, ranging from the design of optoelectronics to understanding communications and signal processing techniques, and from the development of networking protocols to the exploitation of system optimisation. The aim of this Special Issue is to inspire multi-disciplinary international communities to work together in order to achieve hitherto elusive scientific advances.

About the Journal

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Editor-in-Chief

Prof. Dr. Willy Susilo

School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Information Systems) /
CiteScore - Q2 (Information Systems)
