

## Special Issue

# Data Mining and Healthcare Informatics

### Message from the Guest Editors

This Special Issue focuses on the intersection of data mining techniques, biostatistics, and healthcare informatics. With the rapid growth of electronic health records, wearable health technologies, telemedicine platforms, and AI-powered diagnostic systems, there is a critical need for innovative, interpretable, scalable, and ethically responsible analytical methods. These approaches are essential to informing clinical decisions, enhancing patient outcomes, optimizing healthcare delivery, and advancing population health research.

## About the Journal

### Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

*Information* is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

---

### Editor-in-Chief

Prof. Dr. Willy Susilo

School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.

#### Journal Rank:

JCR - Q2 (Computer Science, Information Systems) /  
CiteScore - Q2 (Information Systems)
