

## Special Issue

# Simulation Modeling Theory and Practice: Pushing the Boundaries

### Message from the Guest Editors

In recent decades, modeling and simulation has evolved to the point where it is now a recognized discipline and provides infrastructure for disciplines spanning the whole spectrum of human knowledge, intellectual and practical effects. The term “modeling and simulation” grants equal stress on both modeling and simulation aspects of this discipline. The Modeling and Simulation Body of Knowledge (M&S BoK) is a living work in process with the goal of establishing a kernel of topics that categorically characterize the discipline of modeling and simulation as it drives the progress of multifold disciplines in science, engineering, and the arts. The essence of M&S is the creation of conceptual representations of entities, relations, and processes describing a problem domain with the goal of making them computationally executable artifacts. Such simulation models can be used to perform experiments or to gain experience; both dimensions provide a multitude of possibilities. Potential authors are urged to contact one of the SI editors indicating the general theme to be addressed and to request related material from the prepublication of the M&S BoK.

### Guest Editors

Prof. Dr. Bernard P. Zeigler

Prof. Dr. Tuncer Ören

Prof. Dr. Andreas Tolk

## About the Journal

### Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

*Information* is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

---

### Editor-in-Chief

Prof. Dr. Willy Susilo

School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.

#### Journal Rank:

JCR - Q2 (Computer Science, Information Systems) /  
CiteScore - Q2 (Information Systems)
