

Special Issue

Techniques and Data Analysis in Cultural Heritage, 2nd Edition

Message from the Guest Editor

Cultural heritage is an invaluable human asset, showcasing our achievements over the centuries. The identification and conservation of cultural heritage have always been a challenge, with experts attempting to exploit any possible method to fulfill these aims. With the development of humanity and the invention of new tools and technologies such as computers and digital tools, the concept of cultural heritage conservation has changed considerably, bestowing new opportunities. In this Special Issue, we focus on original and unpublished research articles addressing techniques and data analytics that have been or could be adopted in the domain of cultural heritage.

About the Journal

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Editor-in-Chief

Prof. Dr. Willy Susilo

School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Information Systems) /
CiteScore - Q2 (Information Systems)
